Building on past efforts, GLIDE aims to build upon existing work in disease elimination and catalyze and convene global and local public health efforts.

**MISSION**

Towards Disease Elimination. GLIDE aims to accelerate progress on onchocerciasis, and lymphatic filariasis, and Polio, malaria, onchocerciasis, and lymphatic filariasis are diseases of poverty. They are often complex, reaching into the communities, national, and global levels. Collaboration and coordination are critical to their elimination.

**PRINCIPLES**

1. GLIDE seeks to invest strategically, seizing opportunities and bridging gaps by accelerating thinking and action to help build a community of practice around disease elimination and global health. GLIDE and the UAE will serve as catalysts, conveners, and conduits to globalise and localise global public health. This means bringing global experiences, coordinate, and learn across contexts to accelerate progress towards elimination goals.

2. SUSTAIN PROGRESS

   We believe that sustainable solutions require strong partnerships across public, private, international, and domestic sectors. It is important to work in partnerships in order to achieve our goals.

3. PROMOTE INTEGRATED AND HEALTH SYSTEMS APPROACHES

   To amplify lessons learned from the countries with which it engages, and takes a panoramic view to help countries share experiences, coordinate, and learn across contexts to accelerate progress towards elimination goals.

4. BUILD ON COUNTRY OWNERSHIP AND LOCAL SOLUTIONS

   Recognising that there are more challenges than solutions, GLIDE takes an active role in bringing potential solutions with small grants. It will do this through convenings, tailored training, and facilitating testing of potential solutions with small grants.

5. INNOVATIONS

   New innovations delivered at scale are often have limited focus and there are synergies. To this end, GLIDE seeks to facilitate integrated action and will seize opportunities for synergies. To this end, GLIDE seeks to facilitate integrated action and will seize opportunities for integritation.

**GOALS & STRATEGIC OBJECTIVES**

**PILLAR 1:** ELEVATE AWARENESS AND ENGAGEMENT

1. IMPROVE UNDERSTANDING OF THE RISK TO ELIMINATION

2. SECURE STAKEHOLDER COMMITMENT

3. INCREASE FUNDING FOR DISEASE ELIMINATION

**PILLAR 2:** ADVANCE ELIMINATION STRATEGIES

1. SUPPORT DISEASE RESEARCH, AND LEARNING LEARNED

2. PRIORITY SET (CHALLENGES)

3. ACCESS TO EFFICACIOUS, EVIDENCE-BASED INTERVENTIONS AND STRATEGIES

**PILLAR 3:** FOSTER AND SCALE INNOVATIONS

1. QUALITY OPPORTUNITIES

2. ENGAGE AND TEST NEW APPROACHES AND TOOLS

3. COLLABORATE TO LEARN TO INNOVATE

TOWARDS DISEASE ELIMINATION

**STRATEGIC PLAN 2021-2024**

**GOAL 1**

While there are a number of existing interventions that have proven effective in disease elimination, Disease elimination strategies and plans often have limited focus and there are synergies. To this end, GLIDE seeks to facilitate integrated action and will seize opportunities for integritation.

**GOAL 2**

Amplify data, research, and lessons learned from the countries with which it engages, and takes a panoramic view to help countries share experiences, coordinate, and learn across contexts to accelerate progress towards elimination goals.

**GOAL 3**

Recognising that there are more challenges than solutions, GLIDE takes an active role in bringing potential solutions with small grants. It will do this through convenings, tailored training, and facilitating testing of potential solutions with small grants.
